

## October is Audiology Awareness Month

---

### **Audiology and Cognitive Performance**

In previous newsletters, I've discussed the connection between hearing loss and cognitive performance. Every conference I've been to in recent months has had at least one module on the effect of hearing loss on cognition. While we still don't know causation, we do know there is a connection. Back in the mid-2000's, the American Academy of Audiology widened the scope of practice of Audiologists to include cognitive screenings.

I am pleased to announce I am now certified to conduct a simple but highly sensitive screening test. The test takes about 15 minutes and can indicate the need for further cognitive assessments. If you are interested in this screening, please call the office at 561-366-7219 to schedule an appointment. There is a \$30.00 charge for the test and is not covered by insurance.
